

MAINTENANCE MANAGEMENT

Maintenance Management Solution

MAINTENANCE MANAGEMENT MODULE

IMQS's Maintenance Management Module helps you to overcome key maintenance challenges by centralising and digitising all maintenance related activities on one easy-to-use, spatially enabled platform.

From logging work orders and maintenance scheduling to managing resources and inventory, IMQS has packaged maintenance management onto one central platform which can be directly linked to our asset management solution. Integrate, automate and unify all your maintenance-related data sources, processes and reporting to create one source of truth, creating an environment for effective planning and decision-making.

WHO WE ARE

IMQS constructs business management solutions for owners of infrastructure asset portfolios, to effectively realise their strategic objectives.

Our team of management consultants are committed to conceptualising solutions that enhance the value of your organisation's physical assets, while you focus on the work that matters – delivering key services to your valued customers.

We believe that healthy assets create a healthy society and impacts the lives of people, at all levels, from all communities, on a daily basis.

IMQS has provided proven Infrastructure Asset Management (IAM) Solutions & Services to government and private organisations for more than 20 years, locally and internationally.

KEY FEATURES

LOG AND SCHEDULE WORK ORDERS

Capture, schedule and process work orders on our maintenance management platform. Our maintenance management solution allows you to effortlessly prioritise work orders and allocate responsibility to employees or service providers and keep track of associated costs. Calculate maintenance costs for resources and inventory (such as equipment and vehicles) used on work orders and keep track of progress.

MANAGE RESOURCES

Efficient management of resources is required for comprehensive maintenance planning. Manage your employee and service provider information with our resource manager solution. Capture employee working hours, public holidays and keep track of your service providers on one central platform.

MANAGE INVENTORY

With our inventory manager solution, you can manage, assign and keep track of your inventory items and the employees to which they are assigned to. Our inventory management solution includes fleet, equipment, material and personal inventory items assigned to employees. Inventory Manager enables you to better manage material and inventory required for maintenance planning and expenditure.

REPORT

Our maintenance management solution allows you to generate and access maintenance reports that facilitate tracking and transparency. All reports are configurable and accessible on the maintenance management platform. Reports facilitates effective and transparent internal and external communication and allows for better interdepartmental cooperation, customer communication and stakeholder presentation.

FINANCE

Our solution allows you to capture and manage tariffs in order to link costs to employees and inventory items. Easily define project codes that link to the related maintenance costs and work orders. Also, manage your service provider contracts and related line items associated with those contracts, and link them to work orders, providing you a clear view of your maintenance expenditure.

TRANSPARENCY

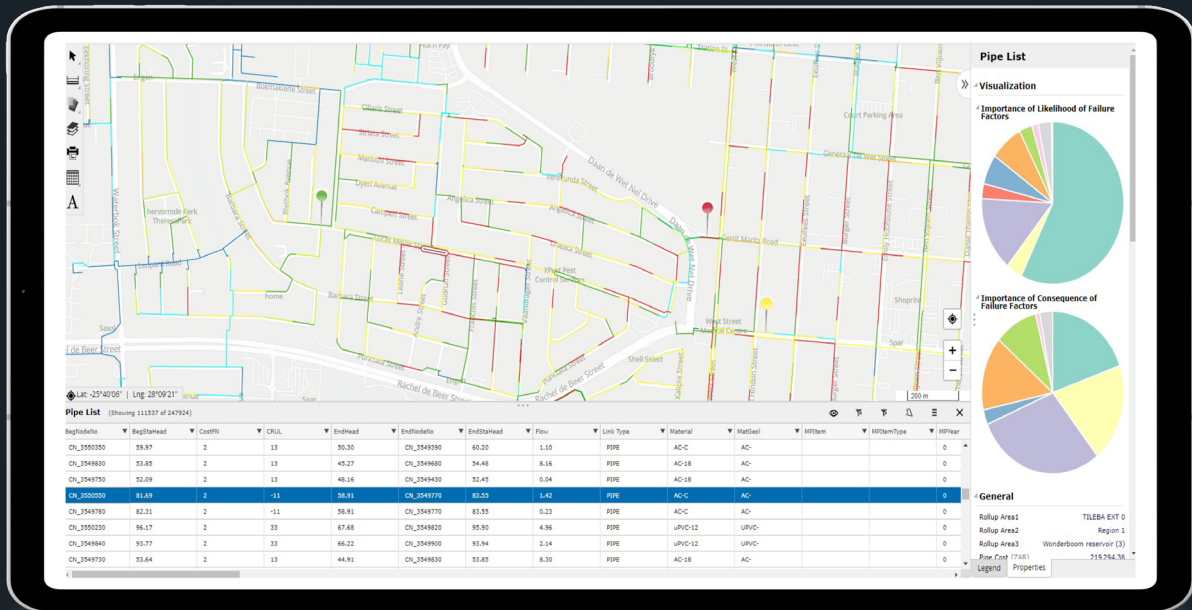

The entire IMQS platform is built to enhance your visibility and accountability. We believe that complete transparency from maintenance job initiation to completion is key to achieving your goals successfully. By implementing a permission-based platform, only permitted users are able to view, access, edit or delete maintenance-related data.

Audit tracking ensures transparent control of all your maintenance-related changes. Configurable workflow approvals add another security layer to enable you to deliver your maintenance job as effectively as possible.

BENEFITS

- Easily plan, log, prioritise and track your work orders
- Allows for effective maintenance and lifecycle planning
- Provides a complete overview of all your maintenance activities
- Keep track of your maintenance expenditure and track costs against specific assets
- Save time and money by reducing manual jobs
- Effortlessly manage your resources and service providers
- Effectively manage, allocate and track your inventory
- Detailed reporting for enhanced visibility

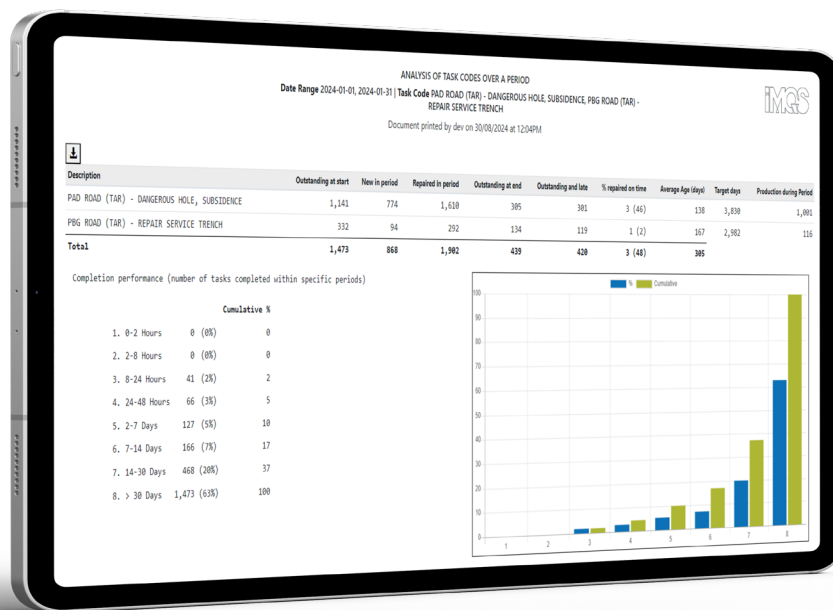

TECHNOLOGY

The IMQS web-based platform is highly flexible and enables effective infrastructure lifecycle asset management. Due to its high level of configurability, IMQS offers a highly flexible platform able to produce tailor-made solutions. Digitally transform your organisation with IMQS.

TECH BENEFITS

- Configurable
- Customisable
- Cloud-based
- User-friendly
- Fast and secure
- Seamless deployment

CONCLUSION

The IMQS Maintenance Management Module empowers organisations for effective maintenance and infrastructure lifecycle planning.

By consolidating all engineering and financial asset information on one GIS-centric cloud-based platform, users gain an informed and interactive view of their entire maintenance environment to plan and execute both scheduled or unscheduled maintenance.

All relevant data, from early warning signs to material shortages, is made easily available to inform rapid proactive and responsive decision-making. Empower work teams by providing accurate incident information, reducing the risk of making decisions based on dissimilar data sets. The visualisation of information, as well as innovative reporting functionalities, makes IMQS a key node in the communication between municipal stakeholders, departments and the public.

While IMQS maintains its own powerful GIS system, the module integrates effortlessly with other GIS ERP systems. This offers users the freedom to work on their preferred GIS platform without having to waste time by switching between systems.
