IMMOVABLE ASSET VERIFICATION SOLUTION

Mobile Enabled Immoveable Asset Verification Application

IMMOVABLE ASSET MANAGEMENT

Facility condition assessments can be time-consuming, costly and prone to errors when done manually. IMQS solves this with a powerful mobile solution that streamlines inspections, standardises data collection, and enhances accuracy with features like real-time data collection, GIS linked Photos, offline capabilities and custom asset hierarchy setup.

Enabling swift decision-making, cost savings and extending the life of your assets has never been easier!

The IMQS Immoveable Asset Verification Solution is designed specifically for organisations managing assets like buildings, roads and other critical infrastructure. Our application simplifies the process of assessing and verifying asset conditions, enabling teams to capture accurate data and effortlessly monitor asset performance.

By leveraging our mobile platform, organisations can conduct audits with ease, ensure compliance, and make informed decisions using real-time data. IMQS transforms immovable asset management, helping organisations enhance transparency, reduce risks, and achieve operational excellence.

IMMOVABLE ASSET VERIFICATIONS

Immovable asset verification refers to the management of assets that are permanently fixed to a physical structure. These include, among others, buildings, roads, bridges, and other infrastructure. By integrating the application into your asset management strategy, you can enhance accuracy and efficiency in tracking and verifying assets across various categories.

The immovable asset verification application is a key component of a comprehensive suite of asset management systems designed to effectively manage and increase the longevity of assets.

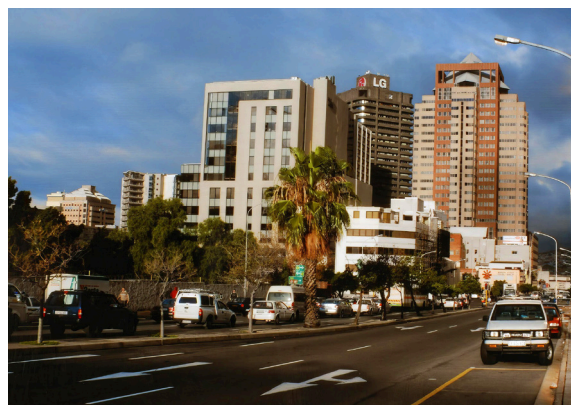

WHO WE ARE

IMQS constructs business management solutions for owners of infrastructure asset portfolios, to effectively realise their strategic objectives.

Our team of management consultants are committed to conceptualising solutions that enhance the value of your organisation's physical assets, while you focus on the work that matters – delivering key services to your valued customers.

We believe that healthy assets create a healthy society and impacts the lives of people, at all levels, from all communities, on a daily basis.

IMQS has provided proven Infrastructure Asset Management (IAM) Solutions & Services to government and private organisations for more than 20 years, locally and internationally.

KEY FEATURES

REAL-TIME DATA COLLECTION

Capture critical asset details, notes, condition ratings, and maintenance observations on-site. This ensures that information is always up-to-date and accessible to relevant stakeholders, eliminating delays in decision-making.

GIS LINKED PHOTOS

Attach location-specific visual evidence, such as photos or videos, to each asset assessment. GIS enhances the accuracy of documentation and provides clear visual context for asset conditions, making it easier for decision-makers to understand and act on the findings.

AUTOMATED CONDITION SCORING

Based on the data entered, the application automatically generates condition ratings for each asset, along with prioritisation metrics that help facilities managers quickly identify which assets need immediate attention. This feature saves time and improves the accuracy of assessments.

CLOUD INTEGRATION

Capture, verify, and update asset information locally, ensuring uninterrupted workflow even in remote locations or areas with poor network coverage. Once connectivity is restored, the app can sync the captured data in our central database, ensuring seamless integration. Our offline functionality enhances operational efficiency, reduces downtime, and ensures that asset verifications can be performed in any setting.

OFFLINE CAPABILITY & SYNCHRONISATION

Perform assessments in remote or low-connectivity areas without worrying about losing data. The IMQS app allows users to capture and store data offline and automatically syncs the information to the cloud once a connection is restored, ensuring no data is lost.

REPORTING AND ANALYTICS

Generate detailed reports and actionable insights that help facilities managers prioritise repairs and allocate resources efficiently. Enable data-driven decision-making and allow for deeper analysis of asset performance and condition over time.

ASSET MANAGEMENT SYSTEM

Link data with the IMQS financial asset register to provide a complete view of your asset lifecycle. This ensure that facility condition data is incorporated into broader asset management processes, improving overall efficiency and helping to align with long-term strategic planning.

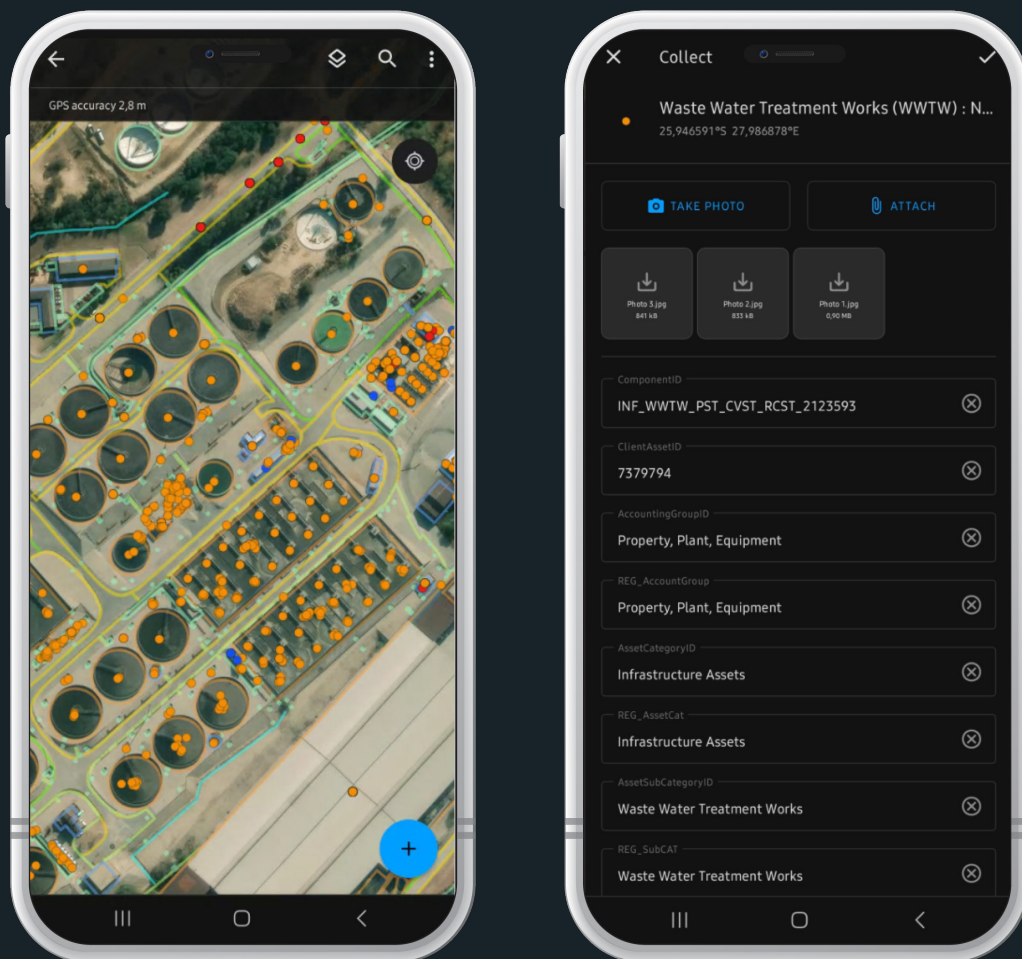

ASSET RECOGNITION & VERIFICATION

Our user-friendly platform allows you to effortlessly capture and record assets in real time, ensuring accurate identification and compliance with international accounting standards, such as GRAP.

BENEFITS

- Improved Accuracy – Eliminate human error by standardising data collection and automating assessments.
- Faster Inspections – Reduce time spent on manual inspections and data entry.
- Enhanced Collaboration – Real-time data syncing and cloud integration facilitate seamless teamwork across departments.
- Cost Savings – Optimises resource allocation by prioritising critical repairs and extending asset lifecycles.
- Better Decision-Making – Provides actionable insights with reporting and dashboards.
- Increased Efficiency – Reduces administrative overhead by automating asset tracking.
- Access Anywhere – Cloud-based storage allows for easy access to data.
- Offline Functionality – Ensures assessments can be completed even in areas with low connectivity.
- Regulatory Compliance – Helps maintain compliance with industry standards and regulations.

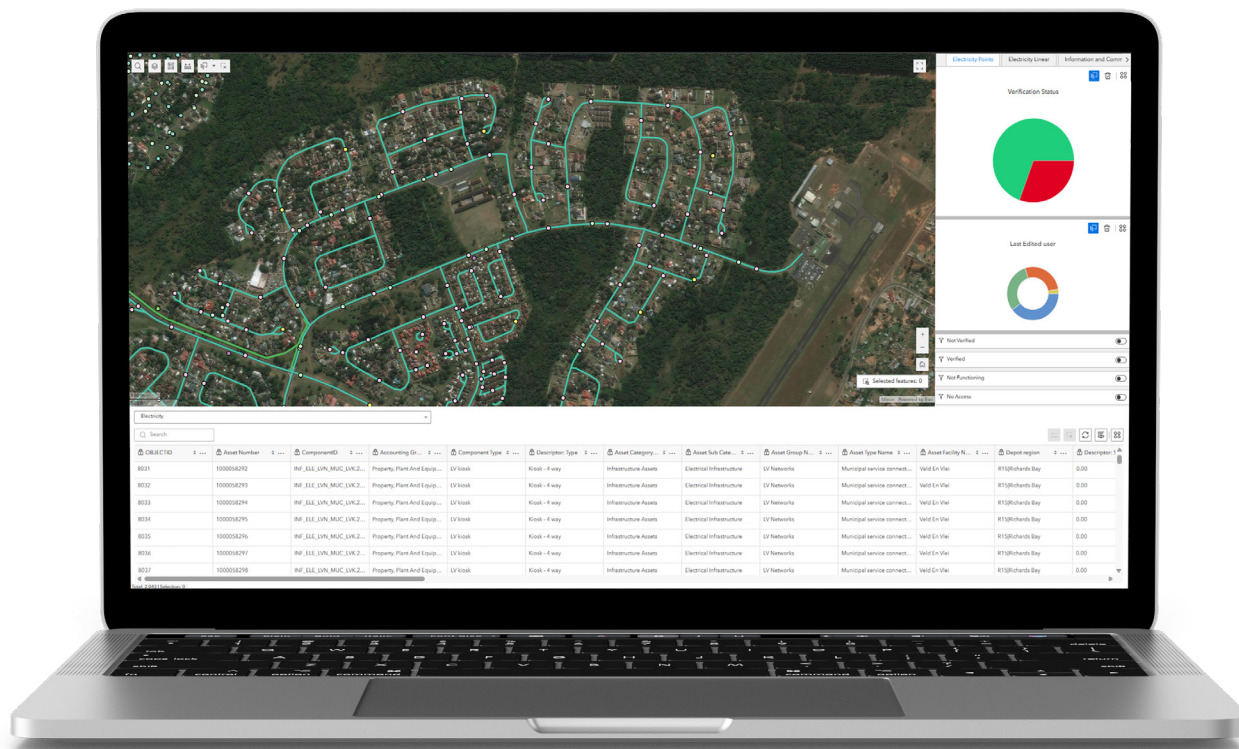

TECHNOLOGY

The IMQS web-based platform is highly flexible and enables effective infrastructure lifecycle asset management. Due to its high level of configurability, IMQS offers a highly flexible platform able to produce tailor-made solutions. Digitally transform your organisation with IMQS.

TECH BENEFITS

- Configurable
- Customisable
- Cloud-based
- User-friendly
- Fast and secure
- Seamless deployment

CONCLUSION

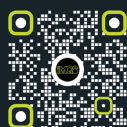

The IMQS Immovable Asset Verification Solution is a powerful tool helping organisations enhance operational efficiency, reduce costs, and ensure better control over their assets.

By providing real-time tracking, improving compliance, and offering actionable insights, our solution empowers asset intensive organisations to make data-driven decisions that optimise asset utilisation and minimise losses.

The IMQS immovable asset verification application offers a comprehensive, efficient, and accurate solution for managing the health of critical infrastructure.
